

## The NORAH Study

*What impact does traffic noise have on the quality of life, health and development of children? These were the three main questions at the centre of the NORAH Study. NORAH (Noise-Related Annoyance, Cognition, and Health) is the most extensive study on the subject of noise impact so far.*

*[More about the NORAH Study \(https://www.laermstudie.de/en/norah-study/\)](https://www.laermstudie.de/en/norah-study/)*

## Results of the NORAH study

*The NORAH study provides scientifically sound insights into the effects of traffic noise on health, well-being, and quality of life.*
